

## The eight key rules for secure online banking.

### Be careful

Keep your login name and PIN confidential, and generally only enter TANs if you want to carry out transactions or for your personal authentication in online banking.

### Do not install any software

No additional software programs are required for online banking.

### Be suspicious

If in doubt, cancel the transaction and notify the Sparkasse.

### Stay alert

Check the transactions on your account regularly in order to detect any unauthorized debits early on.

### Always double-check entries

Check that the displayed order data matches your entries.

### Restrict your daily limit

Set a daily limit for orders in your online banking to restrict unauthorized access.

### Secure entry

To ensure transactions are secure, check for the lock symbol and "https" in the browser window.

### Block access

If you suspect foul play, immediately block access via **116 116**.
